## SOLUTIONS

## 1. Match the opposites.

## 2. Listen and fill in the gaps.

Warm and cool, light and dark, pastel and bright, there are so many different colours. Do you know how many colours we can see?
3. Guess. Circle how many colours you think we can see.

10 thousand 1 million
10 million
4. Now listen on, fill in the gaps, and check your guess.

The International Colour Association is a group of 30 countries, for example the United Kingdom, the USA, Germany, Hungary, Italy and Croatia. They celebrate colours on March 21, International Colour Day. They organise: art exhibitions, architectural projects, fashion and design meetings, colour workshops, colour and light design competitions, wearing national colours.

The Czech Republic is not a member of the association, but we can still celebrate colours. We can see 10 million colours!
5. Describe the colours. (Possible answers)

| warm, dark yellow | light, cool blue | light, pastel, baby <br> pink | dark, bright pink |
| :--- | :--- | :--- | :--- |
